PEANUT ROASTER MACHINE

The multifunctional peanut roasting machine is mainly used to roast peanut of all size for blanching of peanuts in low and high temperature. We can make Light roast peanuts for blanching and dark roast peanuts for peanut butter. Available in 1 & 2 ton per hour

WHOLE PEANUT BLANCHING MACHINE

This peanut blanching machine is used for whole blanching of peanuts. It is very popular design in the market. Making minimum split during blanching. It is compact, reasonably structured and good quality.

VIBRATING SCREEN

This vibrating screen is used for separating peanut split, broken and whole and make dust free. It's available in different size and different sizes of screens and capacity.

PEANUT DESTONER MACHINE

Peanut destoner machines used to remove mainly stones from peanuts. It is working very good with continuous flow of peanuts. Available in 2 ton and 4 ton per hour capacity.

PEANUT SPLIT NUT BLANCHER MACHINE

Peanut split Blancher is used to make peanut split and removing of skin after roasting. It is working very good with minimum broken peanuts with high accuracy of skin removing.

PEANUT SCREENING MACHINE

This peanut screening machine is used to grade different sizes of peanuts. It is available with multiple screens and different screen sizes.

COMPANY INTRODUCTION

IFS (Innovative Food Solution) TECHNOLOGY IS created in 2020 for making food processing easy, safe and competitive. with the wide experience of agriculture and food processing business owner has decided to develop the advance machinery for processing the foods.

IFS TECHNOLOGY is located in western part of India, city Mahuva with only 40-50 kms far from Pipavav Port. Mahuva is well known city for cultivation of Peanut, onion and raw cotton. so, company has decided to start with Peanut Processing Machines first. IFS TECHNOLOGY is willing to make continuous improvement and create the top brand in Peanut machinery.

VISION

To serve best engineering solutions to food industry with made in India premium quality, high performance & low maintenance food processing machineries, equipments.

MISSION

To make india self reliance in food processing industry by manufacturing quality machineries.
